Name: _____

Period: _____

A 5 kg ball is thrown 11 m/s. Find momentum.

What is the Law of Conservation of Momentum?

What is the Law of Conservation of Energy?

A ball on the top of a hill has _____ energy; when it falls down the energy has been transformed into _____ energy. The Law of Conservation of Energy says that the amounts of these two energies are _____.

1. Conduction; 2. Convection; 3. Radiation
- | | |
|--|--|
| ___ From electromagnet radiation (light rays). | ___ In a pot of water. |
| ___ Putting your hand on a hot car. | ___ Liquids and gases become less dense when hot and rise, causing currents. |

Does heat rise? What does rise?

What is thermal equilibrium?

Heat always moves from hot to cold OR cold to hot?

What is electricity?

What is the difference between parallel and series circuits?

Where does light come from?

Harmonic (H), Linear (L), or Wave (W) motion?

Person running: ___	Ocean waves: ___	X-rays: _____
The moon: _____	A swing: _____	Music: _____
Pendulum: _____	A car moving: ___	Bird flying: _____

- Thermal; Nuclear; Radiant; Mechanical; Chemical; Electrical
- | | |
|------------------------------------|---------------------------|
| ___ An acorn in a tree. | ___ Fusion in the sun. |
| ___ Energy from a wall power plug. | ___ The light of the sun. |
| ___ Something hot. | ___ In a piece of wood. |

A 8 kg cart is rolling 5 m/s. Calculate kinetic energy.

A 30 N rock is moved 4 meters. How much work is done?

How much energy was used to move the rock?

If done in 3 seconds, how much power was used?

A 2 kg rock on a 6 meter ledge has how much potential energy?

How much kinetic energy can it have if it falls?

What's the total charge of an object with 14 electrons and 6 protons?

An atom that loses electrons becomes positive/negative.
An atom that gains electrons becomes positive/negative

Increases (I) Or Decreases (D)	Increasing resistance _____ current
	Decreasing resistance _____ current
	Increasing voltage _____ current
	Decreasing voltage _____ current

How big a battery is needed to produce 2 amps through a 4 ohm light bulb?

A 12 volt battery produces what current through a 6 Ω resistor?
